

## Exercise 1. Know what is needed

### Case 1

I'm a law journalist working in New York for 15 years. This weekend I have been invited to participate in a radio talk show on the implementation of the "Patriot Act" in American libraries. The meeting is in three days' time, lasts half an hour and also involves a professional librarian, a conservative politician, a left-wing politician and the family member of a victim of a terrorist attack.

### Case2

I am from Spain and I am a law student. I am starting to work on my final master's project and I have to present it at the end of the year, in nine months. The objective of my work is to analyse the "Patriotic Law", the legal text itself and a comparison with other similar texts that may exist, interpretations or comments made by legal experts in specialized publications and existing jurisprudence related to its application.
